

# AI for Business

Discover what's possible with AI in your organisation.

Streamline processes, improve productivity, and unlock the value of digital data with **AI for Business** by BUI – a customised AI solution for your business, designed and deployed by experts.

## Put AI to work for your **Manufacturing**, **Mining**, or **Retail** company.

**AI FOR BUSINESS IN MANUFACTURING** | Streamline your production planning by weighing sales data and market trends to forecast demand. Streamline maintenance schedules to prevent costly disruptions. Streamline energy management to limit waste and reduce your electricity bill.

**AI FOR BUSINESS IN MINING** | Advance site exploration by making data-driven decisions based on geophysical and geological analysis. Advance mine planning to maximise resource extraction and operational productivity. Advance worker safety with real-time insights about hazards.

**AI FOR BUSINESS IN RETAIL** | Optimise your inventory by examining stock patterns and sales data. Optimise your prices to boost purchasing and profitability. Optimise your marketing efforts to ensure the best results from your campaigns and promotions.

Choose BUI to help you innovate with AI, responsibly and securely. **Let's talk about AI for Business today.**

### OUR PROCESS

#### Discovery

- We explore your business challenges
- We assess your data landscape
- We discuss your AI readiness

#### Development

- We create a design blueprint
- We develop a prototype of your AI solution
- We iterate and improve your AI solution

#### Deployment

- We facilitate deployment and testing
- We refine your AI solution as needed
- We offer end-to-end operational support
