

SECURE AI ACCELERATION FRAMEWORK

From AI ambition to secure, production-ready AI.

A BUI offering. Our proven framework takes your organisation from scattered experiments to a governed, secure, production-grade AI capability, delivered your way and funded flexibly.

A BUI OFFERING • BUILT ON MICROSOFT AZURE

THE PROBLEM

Enterprise AI stalls, often for the same reasons

Organisations invest in AI and experiments run, but results often do not scale. A few failure patterns tend to recur.

1**Shadow AI**

Teams deploy their own tools, bypassing IT. Risk, duplication and ungoverned data flows multiply unchecked.

2**Stalled proofs of concept**

Promising pilots never reach production. Without a delivery model, experiments do not compound into value.

3**Constant rework**

Every new use case rebuilds the same plumbing. Cost climbs, velocity drops, scale never arrives.

THE FRAMEWORK

One framework. Three components. Secure by design.

COMPONENT 1**AI CoE & Solution Envisioning**

Align the business on its highest-value use cases. Establish governance, ownership and a prioritised, risk-scored roadmap.

COMPONENT 2**Secure AI Foundation**

Build once, scale securely. A governed Azure landing zone, with security, identity and data controls every workload inherits.

COMPONENT 3**Generative AI Factory**

From proof of value to production, a repeatable lifecycle that ships solutions and keeps compounding value, safely.

WHAT YOU GAIN

A secure, repeatable path from ambition to outcomes

1

An AI Centre of Excellence

Governance, ownership and a prioritised roadmap across the organisation.

2

A secure AI foundation

One governed platform every AI workload inherits, no rebuilding.

3

Production AI in weeks

A proven, time-boxed path from selected use case to deployed solution.

4

Repeatable scale

A documented factory that delivers new solutions faster with every cycle.

FLEXIBLE INVESTMENT

Fund it the way that suits you

The framework is a BUI engagement, so how you fund it is up to you. We help you find the most cost-effective route.

•

Self-funded

A direct BUI engagement, scoped to your priorities and budget, with no external dependencies.

↓

Azure Marketplace & committed spend

Where you hold a Microsoft Azure Consumption Commitment, transact via Azure Marketplace and draw down eligible unused commitment.

+

Microsoft co-investment, where eligible

For qualifying workloads, we can pursue partial Microsoft co-investment, for example via the Azure Frontier Offer, alongside your investment.

Available funding pathways depend on your Microsoft agreements and workload eligibility. Any Microsoft co-investment is subject to qualification and Microsoft approval and is not guaranteed. BUI will help you identify the best fit for your situation.

Ready to accelerate, securely?

Talk to your BUI account team to scope the framework and the funding route that fits, and move from AI ambition to secure, production-ready AI.
